Professional Summary

I'm a **Frontend Engineer and Technical Writer** building intuitive web experiences and documentation that increases product adoption.

With a background of over 4 years in user experience design, I bring a blend of User Psychology, UX Thinking, Design, Engineering and Communication.

I work at the intersection of engineering, documentation, and user experience roles.

And I'm particularly interested in working with **AI companies, developer tools, and infrastructure products** where great documentation and thoughtful product interfaces can dramatically improve developer experience and product adoption.

Areas of Expertise

- Frontend Web Development
- API Documentation
- Product Documentation
- Developer Advocacy
- Technical Writing
- Community Management
